PROFESSIONAL SUMMARY

Data Analyst with 1+ year of experience in SQL, Python, and Power BI, with hands-on exposure to AWS cloud services (EC2, S3, IAM, Lambda), Linux environments, and AI-assisted automation workflows. Cleaned 70,000+ row datasets, built ETL pipelines with Pandas and n8n, and developed 3+ Power BI dashboards tracking sales, subscription, and operational KPIs. AWS Certified Cloud Practitioner (CLF-C02) with working knowledge of SQL objects (Stored Procedures, Views, CTEs, UDFs) across MySQL, PostgreSQL, and SQL Server.

TECHNICAL SKILLS

Cloud & OS: AWS (S3, IAM, Lambda, EC2) – Certified Cloud Practitioner, Linux (working familiarity), Windows

Programming: Python (Pandas, NumPy), SQL

Analysis & Visualization: EDA, Statistical Analysis, Data Wrangling, Excel, Power BI, Data Visualization

Databases: DBMS, MySQL, PostgreSQL, Microsoft SQL Server

Tools: n8n (workflow automation), AI-assisted development (ChatGPT, Claude), MySQL Workbench, Postman, Git

WORK EXPERIENCE

Junior Software Developer – Database & Analytics | Eleserv Softech, New Delhi *Mar 2026 – Present*

- Designed many relational schemas in SQL Server & PostgreSQL; built SQL objects (Stored Procedures, Views, CTEs, UDFs) to streamline data access and business reporting.
- Wrote complex stored procedures with JSONB parsing, LATERAL joins, and window functions to compute rolling collection and DPD metrics across a 16-table loan schema; optimized queries and indexing for production performance.
- Developed multiple Power BI dashboards for KPI tracking; analyzed Spotify streaming data covering 1,000+ tracks for trend and engagement reporting.

Software Developer Intern – Data & Analytics | Eleserv Softech, New Delhi *Aug 2025 – Feb 2026*

- Cleaned, wrangled, and validated 100,000+ row datasets using Python (Pandas) and Excel; automated 3+ ETL workflows with n8n to reduce manual processing effort.
- Designed and migrated a 29-table Document Management System to PostgreSQL with primary keys, foreign keys, and indexing, ensuring full referential integrity and optimized data access.
- Analyzed 400,000+ records across 4 data sources — WhatsApp campaign, transaction sales, and CRM call data — building the RKB Analytics Dashboard in Power BI for unified funnel and performance insights.
- Leveraged AI tools (ChatGPT, Claude) to accelerate data-cleaning logic, SQL query drafting, and n8n workflow design, cutting development time on automation tasks.

PROJECTS

Anantham – Loan Portfolio Data Management & Analytics System | *PostgreSQL, PL/pgSQL, SQL, JSONB, Stored Procedures*

- Designed PostgreSQL database architecture for Unsecured, Secured, Vehicle, and Credit Card loan portfolios, including raw, processed, error, history, mapping, collection, and DPD data layers.
- Developed PL/pgSQL stored procedures using dynamic SQL, LATERAL JOIN, JSONB processing, aggregations, and window functions to compute collection performance, DPD, post-NPA/write-off recovery, carrying value, and portfolio risk buckets.
- Built dynamic Excel-to-SQL column mapping, audit tracking, referential integrity, and indexing for scalable ingestion, plus account-level credit-spend analytics for downstream reporting.

Real-Time Weather Analytics Dashboard | *Power BI, Python, REST API*

- Fetched live weather data via REST API, transformed JSON into structured datasets, and built Power BI reports with citywise forecasts and dynamic filtering.

E-Commerce Sales Analytics Dashboard | *Power BI, Excel, SQL*

- Wrote SQL queries (CTEs, window functions) to extract sales data; visualized AOV, conversion rate, and regional revenue KPIs in Power BI for business intelligence reporting.

EDUCATION

B.Tech – Computer Science Engineering: MIET, 2021 – 2025

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) — Amazon Web Services, Oct 2024 | Credential
- Deloitte Data Analytics Job Simulation — Forage, Feb 2025 | Credential

ACHIEVEMENTS & LEADERSHIP

- Campus Ambassador – E-Cell, MIET
